

Forklift Reach Experienced Training

This two-day course is designed for experienced operators who do not hold a certificate. A RTITB certificate is awarded to participants at the end of the course provided they achieve the required standard in the theoretical and practical tests.

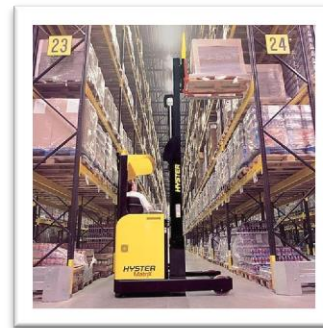

Experienced operators are familiar with the steering characteristics of the lift truck and have the ability to manoeuvre both forward and reverse in a confined area. They should also be experienced in load handling functions.

Letter from Employer needed

On completion of this course participants will be able to:

- Operate a fork lift truck safely, reducing the risk of injury to operate and pedestrians
- Use safe operating habits
- Understand the consequences of taking certain kinds of chances
- Load and unload safely
- Refuel/recharge fork lifts safely
- Handle awkward loads

Participants complete a theoretical and practical exam. On successful completion of the exam participants are awarded a RTITB Forklift Operators Certificate.
