

Our GWO MANUAL HANDLING HALF DAY gives you the chance to ENHANCE your skills for this task. To view available dates for the GWO MANUAL HANDLING and book online, please visit our course calendar here at www.aslsafety.com/training

What you will do while here with us for this course.

GWO BST MANUAL HANDLING

GWO Manual Handling provides the basic safety training required to carry out manual handling tasks in a safe way. The training encourages positive manual handling behaviour in the wind industry.

The training is designed to enable participants to work in a safe manner and meet requirements in accordance with GWO Basic Safety Training.

A GWO Manual Handling training course includes;

Understanding Manual Handling, relevant legislation, standards & guidance

Incident and injury reporting

Spinal and shoulder anatomy and injuries associated with Manual Handling

Risk assessments and control measures

Planning of operations to reduce Manual Handling

Safe manual handling techniques

Participants will be able to;

Identify aspects of their tasks that could increase a worker's risk of developing Musculo/skeletal injuries.

Demonstrate correct manual handling techniques in a simulated environment and a problem solving approach to Manual Handling in a wind turbine environment.

Understand the risks involved in not using correct manual handling techniques

The course involves a combination of practical and theoretical training.

Requirements:

To attend you must register or have registered for a personal WINDA profile before arriving for the course <https://www.globalwindsafety.org/winda/register>

Be over 18, physically and medically fit.

We will register your training with on WINDA.
